Just drove the Gov housing area the same 1 to 2 bars and the Village is the same.
Signal is not strong needs turned up.

Thanks

Voice seems to have improved. Data much worse than before switchover.

Bret, so is this as good as the service is going to get?

It will get faster when the visitors have diminished. Outside of that we need a fiber network. We are working with CenturyLink but it is a \$30million project that they can not fund alone. We are meeting with all stakeholders, including cell companies licensed for the park, on July 15 to see what kind of support we can generate. It will not happen overnight bit I am optimistic.

Quality of service will be the same or worse with AT&T or Union by the way.
