New Cingular is proposing to position a new temporary wireless communications facility located at coordinates 44.454975, -110.810144 which is located on National Park Service land, at Old Faithful Water Treatment plant in Yellowstone National Park, Teton County, WY. This proposal consists of the COLT (Cell on Light Truck) system being temporarily deployed at the water treatment facility. This will be an unmanned wireless communications facility that once constructed will be visited by technicians performing maintenance and updates once or twice a month and will otherwise be unmanned. This proposed COLT system will not use sewer systems, water, or any other utilities other than power and telco. The COLT system will be self-inclusive, all equipment, antennas, and other supporting materials will be located within the COLT system. All work areas needed for construction, and termination, will be located on site at the water treatment facility. This temporary deployment will be for six months and test feasibility for a potential future permanent facility. The existing Verizon tower was identified as not the preferable location for New Cingular's equipment, this COLT proposal would determine suitability of the proposed location for a future tower that could be used for New Cingular's equipment, and to re-locate the existing Verizon equipment then deconstruct the existing tower.
